

Sanitary Stainless Steel Tri Clamp Diaphragm Tank Pressure Gauge

The sanitary pressure is 3A approved and is designed specifically to satisfy stringent sanitary requirements. An ideal instrument that ensures reliability and process integrity for the food, pharmaceutical and bio-technical industries. Sanitary pressure gauges are precision instruments designed for use in pressure -dependent processes in which variation of just a few bar can spell the difference between a mediocre product and one of high quality. Sanitary gauges are specially designed to exceed the demanding safety requirements of the food, dairy, beverage, pharmaceutical and biotech applications.

Technical Specifications:

- **Temperature range:** - 10°C to 100°C
- **Working Pressure:** 0 bar to 10 bar / 0 PSI to 150 PSI
- **SIZE:** 1 - 11/2 clamped

Materials:

- **Body:** AISI 316L

Standard Design:

- Available in size: Clamp diameter 25.4 mm or 50.5 mm
- Standards: DIN, SMS, ISO / IDF. /BS / RJT, ASME/BPE
- End connections: thread, clamp or other upon request
- Corresponding size can be provided upon request.
