

TRI-CLAMP DIAPHRAGM VALVE, SILICONE SEAL -(DMV-3)

TRI-CLAMP DIAPHRAGM VALVE, PTFE+EPDM DOUBLE SEAL -(DMV-1)

Sanitary diaphragm valve is SS304 or SS316L material. Sanitary designed with complete drainage of fluid. It can be sanitized in line with steam (SIP or CIP) or autoclave. It also allows precise control of the fluid flow rate with low turbulence and minimal back pressure.

Design and features

- Seat: Silicone, or Silicone + EPDM double seal.
- Finish: Mirror (0.4µm)
- Diaphragm seat replaceable, low maintenance costs
- Max. working pressure: 145PSI (10bar)
- Working temperature range: -22 ~ 266°F (-30 ~ 130°C)

Size	A	B	H
